Deep State Goes After Trump and Musk's Financial Assets—Who's Next? [Read More @ THE EPOCH TIMES](#)

Commentary

Is America as we know it over? Are we in the middle—or perhaps the end—of the transition from a national republic to a single-party regime that rules by fiat instead of law?

If we look at what's happening to two, high-profile cases, the answer is less than comforting. It is becoming difficult to argue that the U.S. judicial system has not become a political arm of the Democratic Party.

The Left Waging Political Lawfare

Nations are either based on the rule of law or the rules dictated by the powerful. The former is meant to restrain, or better said, eliminate the possibility of the latter. But, as we've witnessed with the relentless political persecution of former President Donald Trump and, lately, of Elon Musk, laws only work when they're fairly applied and enforced.

Neither of those things are happening with President Trump or Mr. Musk. President Trump was found guilty of fraud by a left-wing judge who determined this without considering, or despite, mountains of evidence to the contrary. The New York Attorney General Letitia James accused President Trump of over-valuing his real estate to obtain loans.

Coincidentally, Ms. James ran for the office of attorney general in 2018 with the campaign pledge to go after Trump, showing clear political animus toward President Trump.

Somehow, Deutsche Bank was "defrauded" by President Trump into lending him hundreds of millions of dollars on a property, the value of which the bank determined by their own analysis. Talk about shifty business dealings. Then, after a period of time, the former president had the audacity to sell the property at over \$130 million profit and then pay the loan back, with interest.

Despite all of this exculpatory evidence that showed no fraud and no money loss or any other determinable damages, the judge refused to allow President Trump to give his closing argument in his own defense and found him guilty of fraud, fined him \$354 million plus interest, and forced him to forfeit the profit he made on the deal with Deutsche Bank. President Trump was also ordered to pay \$111,000 per day in interest. The financial penalty is excessive under the Eighth Amendment, which disallows "excessive fines," which is the case because it doesn't reflect the value of the "damages," which are nil, nor the profits he made.

The World's Largest Banana Republic

As unfair and anti-American as those two prosecutions undoubtedly are, they point to a more fundamental development in our national government, which is the undeniable breach of the walls that form the separation of power between the executive, judicial, and legislative branches on which our republic was founded.

Of course, these aren't the only examples of unconstitutional behavior by the left. The Biden administration is still holding American citizens in jail without bail from the events of Jan. 6, 2021, and has reportedly arrested a journalist for being present, reporting on the incident, and providing evidence that conflicts with the Justice Department's version.

Coming soon, to your door 87,000 ARMED IRS agents

Sadly, thug rule is becoming more common, not less. So is the celebration of it in the mainstream media. Persecuting political enemies through lawfare and unlawful asset seizure is the stuff of communist regimes, dictators, banana republics, and, apparently, of the United States of America.

Imagine, if the legal system can be used to go after a billionaire former president and the most innovative and wealthiest man on the planet without due process of law, the question that comes to mind is simply, "Who's next?"

Many of our Tribal readers ask what this and other Government policies have to do with our Tribal Affairs. Everything, as most of our youngsters under the age of 65 don't have a clue what total Government control over the Tribal Government is like. Trump is only a symbol of what's in store for the Tribes if the Woke Marxist succeed.

Fury as FDNY firefighters are forced to remove Stars and Stripes honoring 9/11 heroes after Democrat lawmaker branded it a 'fascist symbol'

- A downtown NYC fire-fighting company was told by a local councilwoman that they must remove from their truck a flag commemorating men they lost on 9/11
- Progressive councilwoman Carlina Rivera's office told the ladder company they had received multiple complaints about the 'political' flag

Authorities at the New York City Fire Department commanded a ladder company in the East Village to remove a flag honoring six of the company's men who perished on 9/11 after a resident complained it was a 'fascist' symbol.

MY VIEW: The really gut wrenching thing about these moronic actions by the woke Marxist Democrats is that although the majority of Americans don't like it in any sense of the word, but for some unknown reason Democrats keep getting elected!

Are this sickness really that popular with the voters? or are the Marxist better organized? Is the GOP so fractionalized as they appear to be in the House they can function?

This un-American nonsense must be stopped between now and November or our Constitutional rights will be a thing of the past. "How did it happen?" will be asked years from now as was asked of Hitlers Germany.

Biden's Supreme Court Pick- Who Can't Define 'Woman' Objects To First Amendment

The controversy surrounding the justice's comments underscores the enduring significance of the *First Amendment in safeguarding individual liberties and the critical role of the judiciary in upholding its protections from government overreach and infringement.*

[Read More @ Curious Historian](#)

MY VIEW: That is Absolutely the intent of the First Amendment. To protect the American people from the Demo/Woke/Marxist, DEI and all other acronyms that threaten our freedom. This is is just one great example of the Marxist DEI in action.

Deranged Entitled Imbeciles is my translation for the DEI acronym.

Several states planning to ban the sale of gas-powered cars as Biden fights climate change

[Read More @ State of the Union](#)

Nine states have adopted California's Advanced Clean Cars II rules that aim to phase out new gas vehicle sales by 2035.

Supporters argue it will significantly reduce emissions and push the auto industry toward electric vehicles (EVs).

However, critics contend the timeline is too aggressive and will increase costs for consumers and businesses without infrastructure to support widespread EV adoption.

"The ban on new gas-powered cars in such an

expedited time does not take costs or feasibility into account," said Ray Cantor, the chief deputy government affairs officer at the NJBIA. "It does not take the lack of local and highway infrastructure into account. It does not take grid capacity into account. It ignores consumer choice. It doesn't take New Jersey residents into account, especially low- and moderate-income families. And it doesn't take the lack of actual environmental benefit into account."

"There's nothing wrong with working to reduce carbon emissions," Cantor said. "And the mar-

ketplace would have likely seen a natural increase of EV users with an organic time frame to build appropriate capacities. But the near-term, targeted mandates will increase the prices of both new and used gas-powered cars."

Debate continues around balancing environmental goals with economic and technological feasibility as both the federal government and more states consider policies to transition the transportation sector away from fossil fuels.

JESSE WATTERS: Biden's economic boom is not for Americans, but for illegal immigrants

Fox News host Jesse Watters reacts to Federal Reserve Chairman Jerome Powell allegedly confessing to a "migrant job fair" on "Jesse Watters Primetime."

TYSON HIRING MIGRANTS WHILE LAYING OFF US WORKERS IS THE 'DECIMATION OF THE AMERICAN DREAM': TOP REPUBLICAN

JESSE WATTERS: *The Fed chair just confessed that "Bidenomics" is just a migrant job fair. There are actually a million less American citizens working today than there were in 2020. As the U.S. economy reopened after the pandemic, Biden has created 5 million migrant jobs. 5 million jobs, not for people born here, born somewhere else. Illegal immigrants walk across the border, Biden busses them to New York, and after 150 days, they're allowed to work. This is the great replacement theory the Democrats said is so racist. Nah, couldn't be.*

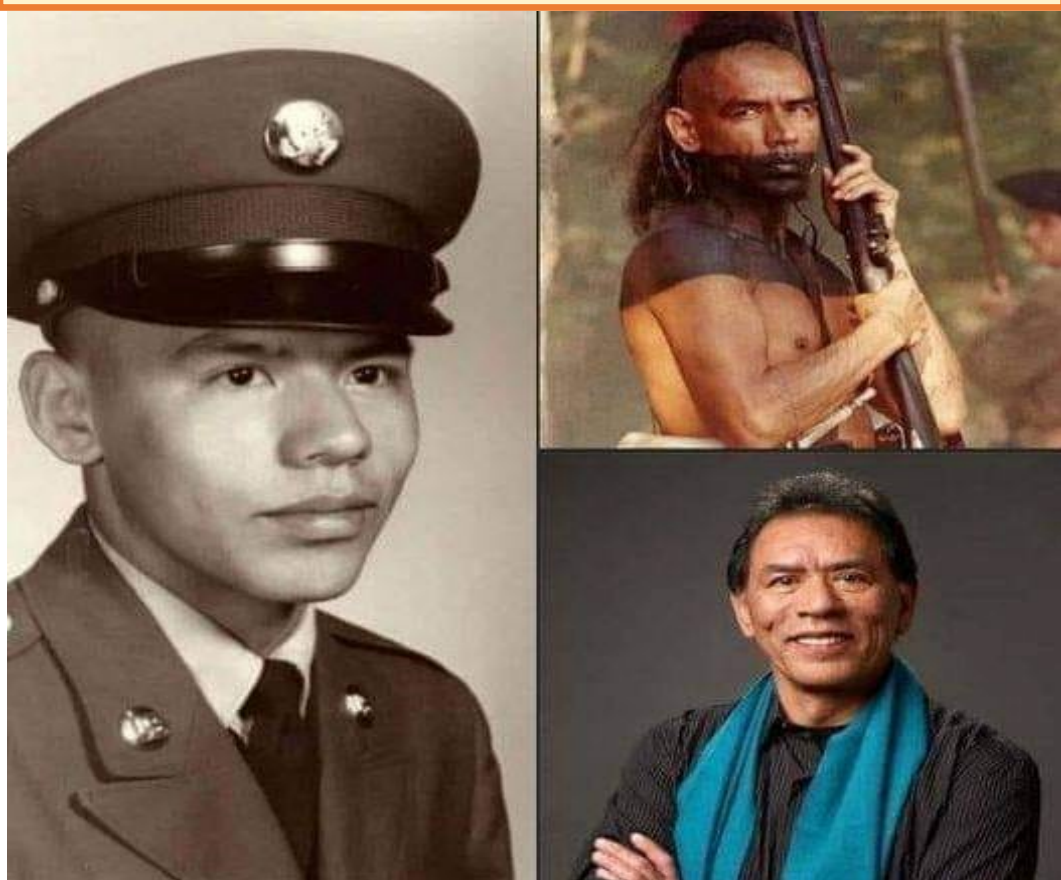

The Biden economy is a mirage, a migrant mirage. It gets even more suspicious. All of these jobs Biden has claimed to have created, millions of them are part-time jobs. Since June, America has lost 2 million full-time jobs. The so-called Biden comeback is a scandal. The president is illegally flooding American industry with cheap labor. Less native born Americans are working, and millions of us are having to take second and part-time jobs. This pushes our wages down and at the same time triggers inflation. The media knows this, but they don't care who does the

work and who loses out. They just want to be served by someone, anyone, as cheaply and quickly as possible.

MY VIEW: The Federal Government is giving Tyson and other big corporations \$10,000 tax incentives for every illegal migrant it hires to replace the American worker they firer. And yet, over 50 million Americans still support Biden. Turn on your main stream news and you can watch the protect against America and Israel shouting "Death to Israel, Death to America!"

Israel Has Been The Land of Abraham Over 4,000 Years

American Allied 76-Year

What is Comrade Biden Missing?

Jacquie Nunez
1h · 2

The land of Israel has been populated by the Jewish people since 2000 BC. Here's the timeline, in case you didn't realize that it is their homeland, as designated by Lord Jesus Christ.

- 1900 BC: Abraham chosen by God as the Father of the Jewish Nation.
- 1900 BC: Isaac, Abraham's son, rules over Israel.
- 1850 BC: Jacob, son of Issac, rules over Israel.
- 1400 BC: Moses leads the people out of Egypt and back to Israel.
- 1010 BC: King David unites the 12 tribes into one nation.
- 970 BC: King Solomon, son of David, builds the first temple structure in Jerusalem
- 930 BC: Israel is divided into two kingdoms, the Kingdom of Israel and the Kingdom of Judah.
- 800s BC: The rise of the prophets, God's messengers.
- 722 BC: Kingdom of Israel is conquered by Assyrians.
- 605 BC: Kingdom Judah is conquered by the Babylonians.
- 586 BC: Solomon's Temple is destroyed by the Babylonians.
- 539 BC: Persians conquer the Babylonians and take control of Israel.
- 538 BC: The Jews return to Israel from exile.
- 520 BC: The Temple is rebuilt.
- 450 BC: Reforms made by Ezra and Nehemiah.

323 BC: The Egyptian and Syrian empire take over Israel.
167 BC: Hasmonean's recapture Israel, and the Jews are ruled independently.

- 70 BC: Romans conquer Israel.
- 20 BC: King Herod builds the "second" temple
- 6 BC: Jesus Christ is born in Bethlehem
- 70 AD: Romans destroy the temple

After that, the people were captives to the Romans, Byzantines, Arabs, and Crusaders. Through all of these events, the Jewish people continued to live in Israel. There were more or less of them, depending on the centuries, but there was never a time when the Jews didn't live in the land. They stayed, they built their communities, they raised their families, practiced their faith and they suffered at the hands of many outside rulers, but they always kept their faith. It is what sustains them, even now.

In 1948, the UN established the State of Israel, the nation of Jews. Don't buy the Palestinian lies that they are entitled to the land. It simply is not true. God will also provide a way for his chosen people to live in Israel, as He has for thousands of years. Pray for the people of Israel.

Cherokee Nation wants federal law fix on Black tribal citizens

One of the nation's largest Indigenous tribes is seeking to change a 140-year-old federal law that governs criminal jurisdiction of tribal citizens on reservations based on "blood quantum."

Why it matters: The move by the Cherokee Nation comes as the Oklahoma tribe is welcoming the descendants of formerly enslaved Black people once owned by tribal members as citizens.

The big picture: The challenge to the federal Major Crimes Act also comes as more Indigenous tribes assert themselves over issues of sovereignty, political representation and how they should define who is a tribal member.

Zoom in: Cherokee Nation principal chief Chuck Hoskin Jr. tells Axios the tribe is asking Congress to revamp the 1885 federal law that

focuses on "Indian blood" — a racial category many tribes now shun.

- Federal courts have interpreted that law to require tribal citizens charged in criminal cases on tribal land to have a certain "blood quantum" to be prosecuted in federal or tribal court instead of state.
- Hoskin says the law discriminates Cherokee citizens of Freedmen descent who may be tried in state court with other non-tribal members, and it needs to be updated for a new reality.
- *"It's about the United States respecting tribal sovereignty and, frankly, catching up with the Cherokee Nation in terms of equality for all of our citizens, including Cherokee citizens of Freedmen descent."*

Background: The Supreme Court ruled in 2020 that a larger portion of eastern Oklahoma falls within an Indigenous reservation, preventing state authorities from prosecuting offenses committed by Native Americans on tribal land.

[Read More @ ASP](#)

MY VIEW: One of the many positives in this case is the Tribal recognition of the anti-Tribal Federal & State Governments mandated policies of "blood quantum" is to the political relationship between the Tribes & Government.

The political relationship between the Tribes and U.S. Government is once again before the supreme court in the Indian Child Welfare Act as the court has failed recognize it. It is also at the center of Maverick LLC v U.S. Government.

The PHM Service will be the backbone of the CalAIM initiative, and will leverage data to help address health disparities, social determinants of health, and provide whole person care.

It was a difficult decision to step away from my work supporting CA Tribal communities at CRIHB. However, I made that choice knowing the impact I could make in this new role would provide even greater benefits to American Indian and Alaska Native people in the long run.

The team I'm working with were all hand selected and are extremely capable people. I look forward to learning from them, and helping inform the project from a Tribal perspective. Proving the PHM Service at this scale is a first-in-the-nation endeavor, and including Tribes in the building process will result in greater health equity and fewer health disparities in the future. There is a lot of work ahead, but I love a good challenge and look forward to engaging and informing my team and Tribal communities throughout this process.

Redbone, An American Indian Icon

Redbone was a Native American rock band. They reached the Top 5 on the U.S. Billboard Hot 100 chart in 1974 with their single, "Come and Get Your Love". The single went certified Gold selling over a million copies. It also made Redbone the first Native American band to reach the top five on the Billboard Hot 100, with the song reaching number 5.[1] Redbone achieved hits with their singles "We Were All Wounded at Wounded Knee", "The Witch Queen of New Orleans", "Wovoka", and "Maggie" in the United States, although these singles were more successful overseas

Tracy Lee Nelson, "The La Jolla Man" began his music career with Redbone shortly after he graduated from Hollywood High School, before launching his own band.

Tracy Lee Nelson is one of the best guitar player in the Country today. "The La Jolla Man" can light em up! He can carry a vocal tune along the level of the great Louie Armstrong!

The Woke/Marxist Socialist Justice ideology will replace the Constitution in America on November 5, 2024.

Here is why I offer this alarming prediction; They have already made a mockery of the judicial system not to mention the Government bureaucracy, 'Deep State.'

I always think of Hitler's infamous quote when I see how many citizens support the Woke/Marxist ideology; "An uninformed population is a politicians dream." It didn't impede his quest for political control of Germany which was a Democracy when he was elected. He grew his authority by controlling the media, education and food supply. Sound familiar?

Over the past three-years they have been totally successful in eliminating any and all objections or challenges to the voting machines by using the political system to intimidate software experts that provided proof of how the voting machines are able to be accessed and manipulating from off site sources and the judicial system by suing and awarding the machine company millions of dollars in damages and making it known that the full rath of the United States Government would be at your door.

The same voting machines will be used in the November 5, 2024 election and the Trump fiasco, Israel and Bidens' folly is nothing more than a distraction.

In August 2024 at the Democrat Socialist Convention the Biden-Harris ticket will be punched in favor of California Governor Gavin Newsom and Susan Rice and the machines will be back in play.

The transformation of America to an elitist globalist Nation will be on steroids.

But it can be stopped. The American patriots need to put electronic jammers to prevent access to the voting machines from off site. Every machine must be inspected for hidden trojan software that can manipulate the vote count. And the people must vote.

Those MAGA EXTREMISTS Want To Lower Inflation, Lower Gas Prices, Secure The Border And To Become Energy Independent! THEY MUST BE STOPPED!

Read More @ History Daily

The White House revealed its decision to eliminate an extra \$7.4 billion in debt as part of the Biden administration's recent push for broad student loan forgiveness before the election. This initiative aims to assist around 277,000 borrowers nationwide amid a national debt exceeding \$34.5 trillion.

Missouri Attorney General Andrew Bailey led the lawsuit, following similar actions by Kansas and ten other states against the Biden administration's plan in recent weeks.

"With the stroke of his pen, Joe Biden is attempting to saddle working Missourians with a half trillion dollars in debt."

"The United States Constitution makes clear that the President lacks the authority to unilaterally 'cancel' student loan debt for millions of Americans without express permission from Congress," Bailey told Fox News Digital.

"The president does not get to thwart the Constitution when it suits his political agenda. I'm filing suit to halt his embarrassing attempt to buy the 2024 election in direct violation of the law. The Constitution will continue to mean something as long as I'm Attorney General."
